

Abstract Review System Scope

HENNAC conference planning, abstract reviews, poster competition, work with different institutions. It need to be able to review folders that match with students and gives them feedback about their work. The submissions must be in word or another editable format. Edits can be made in word or in the web browser.

Sequence of completion:

- Submission of work
- Review by mentor
- Feed back to the student
- Edits or corrections to the work
- Should be updated by student
- Sent back for review
- Approve

The abstract can be resubmitted only if it was not rejected. It should be able to notify the reviewer that changes or corrections were made. It should show the deadline.

Students are going to be submitting their abstracts from more than 15 institutions. Students are undergraduate from CS, EE, or Math. There are 2 levels of competition, graduate, and undergraduate.

It should store, last name, first name, major, and classification. Title of the abstract, mentor/mentors, institution, keep track of mentor email, ethnicity, gender, and student email.

It also needs to be able to see how many abstracts have being summitted, CAHSI colors, and logo must be present. Students can submit, view, and update the abstract but they cannot delete it. It must keep information from previous years.

Review

Statuses:

- Approved – Ready for submission
- Approved- with Corrections
- Not Approved – Major Corrections (Can still submit)
- Rejected (Cannot Submit again)

Must be time sensitive. Posters are in editable form, (PowerPoint)
